

Tilt-up office building

Under contract with Busby Enterprises, Inc., HCG provided structural engineering for a new 26,000 square foot tilt-up concrete building near the Napa Airport. The building was designed as an office condo structure which will be subdivided into office / shop suites. HCG's scope was to furnish structural engineering plans, calculations, specifications, shop drawing review, field inspections and accommodate contractor revisions. Construction costs were estimated at \$2,500,000.

“HCG provided structural engineering for new 26,000 square foot tilt-up concrete building near Napa Airport”
